

Time Travel: Ancient Egypt Egypt around 2500 BCE

This week you will take your time machine to Ancient Egypt. You will travel to approximately 2500 BCE at the height of the Ancient Egyptian Empire. This was when the Great Pyramids of Giza and the Sphinx were being built. How the pyramids were built has always been a mystery that historians have argued about for years.

While in Egypt, explain the following:

1. How were the Egyptians able to build the pyramids with such heavy stones?
2. How did the Sphinx lose its nose? (I know this can be explained in “real” history, but have some fun with this!)

What does your character see while in Egypt?

Who do they meet along the way? (Famous Egyptians? Pharaohs?)

How were the Pyramids built? What tools did they use?

Why were the pyramids and sphinx built?

How do you arrive back home?

Some things to consider:

What do the buildings look like?

What do the Egyptian people wear?

What do Egyptians eat?

What do they do for entertainment?

What do Egyptians use for tools?

Here are a couple videos you might want to watch to get you thinking about Egypt:

[What did Ancient Egypt Look Like?](#)

[Daily Life in Ancient Egypt](#)

You may want to do some research to learn more about Ancient Egypt before you start writing too!

You MUST include a detailed, coloured, illustration to go along with your writing!

Have fun with this and make it interesting as you get to decide what happens on your travels.

When you are done this section, please upload to FreshGrade. I'm excited to see what you come up with!
