

Week 2 – April 13-17

Here is a plan for this week of learning. All dates and times are suggestions, and feel free to move things around and do them at a time that works for you. If you want to read more than I say, do it! If you want to play more Math games than I suggested, go ahead! Try to complete everything on the list by the end of the week though.

I sent out usernames and passwords to Parent Emails on Thursday. These are for websites like Prodigy, Code.org, Khan Academy, Sumdog, and Typing Club. If you haven't checked these out yet, ask your parents for your login information.

Daily Jobs

P.E. – Get some form of exercise everyday! Walk, run, bike, dance, do yard work... anything that gets you moving! Get out and enjoy the sun!

Art/ADST – Try to do some type of activity that you enjoy throughout the week that fits into one of these categories. Draw, paint, play an instrument, build something, play with LEGO, Code.org, bake, cook, etc. Spend some time away from those screens!

Weekly Schedule of Student Learning (Approximately 1-2 hours/day)

Monday, Apr. 13 – Easter Monday – Enjoy some time with your family.

Tuesday, Apr. 14

Visit my new class website and answer the Question of the Week. <https://tzellman6.wixsite.com/mysite>. Don't forget to bookmark this new site so you can find it easily. This is how I will keep students up to date on what you should be doing.

Language Arts – 30-40 minutes – hopefully you started a book last week. If not, find something to read. If you don't have any books at home, check out Tumblebooks. After reading, tell someone what you read about! (if you need instruction to Tumblebooks, check out my new site for a link)

Math – 30-40 minutes – sign into Prodigy and explore the world. As you fight monsters, you will be asked questions. At first, these will be about Fractions and Decimals, but then they will change to be more general questions for Grade 6/7. It will level itself based on what you get right or wrong. Some concepts we haven't covered in class yet, so just do your best!

Wednesday, Apr. 15

Language Arts – 30 minutes – Journal – if you haven't started a journal yet, you should! Choose one of the topics and write a few paragraphs.

- 1) If you could have one superpower, what would it be? How would you use this power?
Would you be good or evil, or neither?
- 2) What is your favourite movie? What makes this movie your favourite?
- 3) Your choice – choose any topic, or write a story

Math – 30 minutes – see the link on my website to see the Math worksheet for today. Don't print the worksheet, just answer it on a separate piece of paper.

Thursday, Apr. 16

Language Arts – 30 minutes – continue reading your novel from Monday.

Math – 30 minutes – Prodigy – today Mr. Zellman will be online too! See if you can find me and battle. Here are some instructions to help find me.

- 1) Choose to play from **Home**
- 2) Click **More Worlds** in bottom right corner
- 3) Choose **Tinkertown**
- 4) I will be in **Lamplight Town** between 10:00-11:00
- 5) My name is **Tom Quakevoice**
- 6) Find me and battle!

Friday, Apr. 17

Language Arts – 30 minutes – Reading/Journal – Read for 15-20 minutes, then take some time to write in your Journal about what you have read so far in your book. This should be a short summary similar to what we did in our Lit Circles unit (Rule of 5). If you made any Connections, write that down as well. Finally, make a prediction of what will happen next in your book.

Math – 30 minutes – Math Game – play a Math game online (Prodigy, Sumdog, or something else), play a board game, play cards. Your choice!

If you have any questions about anything listed above, please send me an email and I will try to explain it. (tzellman@sd57.bc.ca) If the schedule doesn't work for you, switch it up! Don't get overwhelmed, but do your best!
